Mr. Tony Larimer
Director of Sales & Marketing
Dan Am Company
One SATA Drive
Spring Valley, MN 55975

Mr. Larimer,

The Maricopa County Air Quality Department (department) has completed review of the documents you provided requesting the use of the **SATAjet RP, SATAjet RP Digital, SATAjet RP Digital 2, SATAjet 3000 RP, SATAjet 3000 RP DIGITAL, SATAjet 3000 B RP or SATAjet 3000 B RP DIGITAL (SATA jet RP)** spray guns. At this time, the department is conditionally approving the use of the **SATAjet RP** spray guns within the jurisdiction of the department. This approval is limited to the application of coatings subject to Maricopa County Air Pollution Control Regulation III, Rule 345, Vehicle and Mobile Equipment Coating.

This approval is subject to the following conditions:

1. SATA Total Sales and Marketing must supply written notification with each **SATAjet RP** spray gun sold or distributed for use within the jurisdiction of the department that the spray gun is only approved for the application of coatings subject to Maricopa County Air Pollution Control Regulation III, Rule 345, Vehicle and Mobile Equipment Coating.
2. This approval is only valid if the air pressure supplied to the **SATAjet RP** spray guns is equal to or less than 35 psig. SATA Total Sales and Marketing must supply written notification with each **SATAjet RP** spray gun sold or distributed for use within the jurisdiction of the department that the maximum air pressure supplied to the spray gun must not exceed 35 psig.
3. SATA Total Sales and Marketing must supply a SATA air micrometer with clearly identified maximum allowable spray gun inlet air pressure for each **SATAjet RP** spray gun sold or distributed for use within the jurisdiction of the department. The required modification must provide a visual confirmation that the maximum allowed air pressure is 35 psig. An example would be color coding the gauge to make the area of the gauge at and below 35 psig green and the area of the gauge above 35 psig red or other design approved by the department. SATA Total Sales and Marketing must supply written notification with each **SATAjet RP** spray gun sold or distributed for use within the jurisdiction of the department that the SATA micrometer must be attached to the spray gun and be in good working condition whenever the spray gun is in operation.
4. This approval is only valid if during actual operation the **SATAjet RP** spray gun is equipped with a properly operating SATA air micrometer with gauge as described in condition number 3.

Protecting our most vital, natural resource; air.
www.maricopa.gov/aq

5. SATA Total Sales and Marketing must add a clearly visible permanent label specifying that the inlet air pressure must not exceed 35 psig to all **SATAjet RP** spray guns sold or distributed for use within the jurisdiction of the department.
6. This approval is only valid if during actual operation the **SATAjet RP** spray gun is labeled as described in condition number 5.
7. This approval is only valid for the **SATAjet RP** spray gun models.
If you have any questions regarding the conditional approval of the **SATAjet RP** spray guns listed above, please call me at 602.506.6443 or Cheri Dale at 602.506.3476.

Sincerely,

Lawrence Odle
Director
